

Technical Research Assistant in Stem Cell Epigenetics

A 2-year full-time position is open for a technician to work on a stem cell epigenetics project in the Laboratory of Cell Differentiation at the Institute of Molecular Genetics, ASCR (Prague, Czech Republic).

Project

The project will examine the mechanism by which Fam208a-containing protein complexes contribute to the establishment of constitutive heterochromatin during embryonic stem cell differentiation. Realization of the project will involve chromatin analysis methodologies and advanced imaging techniques.

Candidate's profile

The candidate should have experience with basic molecular biology, cell culture, and/or protein chemistry techniques. The candidate should have good organizational skills and be able to communicate effectively in English.

Offer

Modern institute with state-of-the-art facilities. Dynamic environment. Competitive salary. 2-year funded position, with possible prolongation, available immediately.

Contact

Interested applicants should submit a letter of interest and a curriculum vitae to:

- Dr. Kallayane Chawengsaksophak (kchaweng@img.cas.cz) Project Leader
- Petr Bartůněk (bartunek@img.cas.cz) Lab Head
